As per the decision taken in previous meeting dt: 21/10/2008, the modalities of Data exchange were discussed. Following issues were discussed and finalized:

- i) It was decided to exchange the SCADA data (Active power (MW), Reactive Power (MVAR) and Voltage) for all Inter-exchange points. In addition to this, NDPL requested for Circuit Breaker status of all 11kV feeders emanating from 220kV Sub-stations. The feasibility for the same shall be studied by O & M deptt. for compatibility of Circuit breakers.
- ii) Since present SCADA system of SLDC was not designed for integration of 11kV System parameters, it will not be possible to exchange data of 11kV DTs.
- iii) Discoms will provide their list of Inter-exchange points to SLDC, and on the basis of these SLDC will prepare a final list of Data Exchange points.
- iv) Data exchange between SLDC & Discoms will be through ICCP servers, to avoid time delay & manual intervention. NDPL informed that their ICCP server will be configured by July 2009.
- v) CAPEX requirement to be worked out.
- vi) Data exchanged between SLDC and individual Discom, will be shared with other Discoms through SLDC.

Next meeting has been scheduled on 14/11/2008 at 4:00PM GM(O&M) Office Park Street.
